DETAILED ACTION

Allowable Subject Matter

Claims 1-18 are allowed. The following is an examiner's statement of reasons for allowance: The prior art does not disclose a process for pyrolyzing tire shreds involving production of a gas stream comprising hydrocarbon and a solid comprising carbon whereby the solid comprising carbon is removed from a pyrolysis reactor, the gas stream comprising hydrocarbon is directed into a separator, and the gas stream comprising hydrocarbon is contacted with an oil spray in the separator thereby washing particulate from the gas stream and condensing a portion of the gas stream to oil and whereby the oil is subsequently cooled and a portion is reused as an oil spray. The prior art also does not disclose a process for pyrolyzing tire shreds involving directing a gas stream comprising hydrocarbon from a pyrolysis reactor to a separator for condensing a portion of the gas stream; directing the solid comprising hydrocarbon into an auger having a pressure in the auger which is greater than a pressure in the pyrolysis reactor; directing a portion of non-condensed gas from the gas stream to at least one burner in heat exchange relation with the pyrolysis reactor; burning the non-condensed gas from the gas stream in the at least one burner to heat the pyrolysis reactor and thereby generating an effluent flue gas; extracting a portion of the effluent flue gas; cooling the extracted portion of the effluent flue gas; and injecting the cooled portion of the effluent flue gas into the auger.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Avetisian et al. (USPN 5,423,950) ; Horton (USPN 4,900,401) ; Denison (US 2002/011788 A1). The Avetisian et al. reference discloses a method for producing tire oil by mixing shredded tires and oil and heating them together. Horton discloses a pyrolysis system including an anaerobic pyrolysis chamber. Denison discloses the use of a solid filter aid for removing contaminants in a pyrolysis system.
